PROJECTS

Client Server Interaction System

Technology: Java Programming Language,
Description: This is an application that will help communication between client and server. To perform communication, we use the concept of socket programming. With the help of IP address and port number we will establish connection between client and server, and hence the message transfer between client and server will take place.

Generalized Data Structures Library
Technology: C++ Programming Language
Description: This project is considered as a library which contains generic implementations of all major types of data structure. We provide the readymade implementations of all fundamental operations as well as advanced operations onlinear, nonlinear data structures in an object-oriented way. We provide the generic way of implementation so we can use the functionality for any type of data types.
